

Discs for Power Trowel Machines¹

Discs are used as expendables for power trowel machines for initial trowelling of surface layer of concrete or sand-cement foundation. Discs of different size and form are produced of special cold-rolled steel for all existing types of power trowel machines.

Diameters: 610mm, 760mm, 800mm, 840 mm, 915mm, 945mm, 950mm, 980mm, 1080mm, 1200 mm

¹ Due to continuous change in machines' construction, fitness of discs to the machine should be double-checked.

Blades for Power Trowel Machines²

Blades are used as expendables for power trowel machines for finish processing of upper level of fresh concrete or sand-cement surface. Blades are produced of special spring cold-rolled hardened steel. Blades have three modifications: *finish*, *combo* and *float* as well as different forms and sizes for all existing power trowel machines.

Specification: [blade length] – [blade width] / [fixture size]
