

Spreader Wagon

EFFECTIVE

-

UNIVERSAL

-

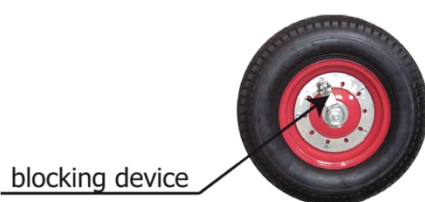

MULTIFUNCTIONAL

Spreader wagon (SW) provides even scattering of topping material on wet concrete surface to achieve homogeneous in color and durability floor surface.

Model	SW 1000
Weight, kg	45
Material capacity, kg	100
Width general, mm	1060
Width operating, mm	1000
Height, mm	1126 ± 50
Length, mm	990

Features:

- *Regulated discharge of topping per sq. m.*
- *Improved reliability due to spherical bearings*
- *For SW-800 the wire drum is shifted relative to the bunker that allows topping from the bunker to fall down straight on the floor*
- *For SW-1000 wide pneumatic wheels do not leave track on fresh concrete*
- *For SW-1000 manual blocking device for one or two wheels with the drum for even material scattering*
- *For SW-1000 high maneuverability due to possibility to unlock the wheels from the drum.*
